

PPG Automotive Coatings Supplier Audits

Supplier Development Audit Objectives:

Confirm ISO9001:2015 certification and IATF16949 Minimum Automotive QMS Requirements compliance

Build trust and strengthen relationships

Educate Suppliers on PPG specific requirements (e.g. contamination prevention)

Develop Current Suppliers

Approve Potential Supplier or Current Supplier that has not previously supplied a specific material

Gain an understanding of Supplier processes

Check effectiveness of corrective and preventative actions from a complaint investigation or previous audits

Supplier audits are planned based on the following criteria:

- Supplier Development program
- Critical Suppliers (resin, solvents, additives, containers)
- Customer Requirements
- Supplier Evaluation and/or Approval
- Quality Issue – Corrective and Preventative Actions
