

Summary of Recent Changes to PPG OEM Supplier Requirements

DATE	DOCUMENT NAME	VERSION	SUMMARY OF CHANGES
05/19	SQR02_PPG Automotive Change Notification Requirements	00	Overall procedure revision – wording of requirements and notification form simplified.
07/19	SQR03_PPG Automotive COA Requirements	00	Added shelf life requirements. Removed requirement to have a silicone statement on the COA for silicone containing materials.
07/19	SQR07_PPG Automotive Bulk Transport Requirements	00	Consolidation of requirements for solvents, resins and paint transport requirements
04/19	SQR08_PPG Automotive Recycled, Reconditioned and Rebottled Packaging Policy	00	Rebottled IBC requirements added to the previous recycled drum policy. Replaces SQB19.
06/19	SQR09_PPG Automotive Equipment Cleaning Guidelines	00	Perfluoropolyether (PFPE) cautions added.
05/19	SQR12_PPG Automotive Low Surface Tension Materials Handling	00	New document created to explain low surface tension material categories in addition to silicone (polysiloxanes) but with other low surface tension materials. Replaces SQB08 Silicone Handling Guidelines.
01/19	SQR14_PPG Automotive Crater Prevention Training	00	Formerly SQB11 Updated and re-formatted.
11/19	SQR01_PPG Automotive QMS Requirements for Suppliers	01	Formerly SQB15 Target dates for MAQMSR compliance.
12/19	SQR03_PPG Automotive COA & Shelf-life Requirements	01	Change the name of document adding Shelf-life requirements and additional requirement when filling date and/or shipping date data in the COA.
10/20	SQR07_PPG Automotive Bulk Transport Requirements	01	Change indication of pH of rinse water according to code “T20”.
10/20	SQR01_PPG Automotive QMS Requirements for Suppliers	02	Addition of toll manufacturing for QMS progression.
02/21	SQR03_PPG Automotive COA & Shelf-life Requirements	02	Additional requirement for COA content: Type of inspection performed acc. to EN10204 or equivalent.

06/21	SQR07_PPG Automotive Bulk Transport Requirements	02	<p>Solvent deliveries (TABLE1): clarification on the solvent concept adding a physical parameter to select the pre-load and specific steps to follow to select the pre-load.</p> <p>Non-solvent deliveries (TABLE 2): Clarification on chemical groups and specific cleaning process for Strong Acids & Basis and "Others" group. Clarification comments for another cases when materials are not mentioned in the table.</p>
03/22	SQR_01PPG Automotive QMS Requirements for Supplier	03	QMS Progression table changes and additions: toll manufacturing and effect pigments.
05/22	SQR07_PPG Automotive Bulk Transport Requirements	04	<p>Additional examples of prohibited pre-loads: Fatty acids and fatty alcohols with C atoms \geq C10, Liquid to waxy (any kind of material).</p> <p>Clarification of need of SDS & TDS when commercial name is shown on the cleaning document.</p>
05/22	SQR02_PPG Automotive Change Notification Requirements	01	Adding minimum period of notification: 90 days, link to change notification and approval form, list of minimum change notification requirements.
06/14	SQR07_PPG Automotive Bulk Transport Requirements	05	Additional clarification on the scope, specific naming to cover all types of bulk transport, MSDS & TDS must be sent when commercial name is in the cleaning document, additions to TABLE 2 (Paints & primers as prohibited pre-loads).
